

Waldron Solutions – Bulk Petroleum Supply & Procurement Brief

Waldron Solutions Pty Ltd is an Australian-based consultancy specializing in connecting buyers and suppliers of bulk petroleum products across the globe. Our reach enables us to facilitate introductions and information exchange for high-volume petroleum transactions.

Our Capabilities:

- **Product Range:** includes EN590 diesel (10–50 ppm), Jet A1, light crude oil, fuel oil D6, LNG, and more across multiple grades.
- **Volume:** Access to contracts ranging from trial shipments to long-term, large-scale allocations.
- **Delivery:** CIF, FOB, CFR and tank-to-tank options at major international ports.
- **Compliance:** All products meet international standards (EN590, ASTM, SGS/Bureau Veritas inspection), with full documentation and regulatory support.
- **Process:** Waldron Solutions does not negotiate contract terms or conditions. Instead, we provide transparent reporting of supplier costs and buyer requirements. All commercial negotiations and contract finalization are conducted directly between the supplier and the buyer.
- **Confidentiality & Integrity:** All transactions are supported by robust confidentiality and non-circumvention protocols.

Why Choose Waldron Solutions?

- Our network spans across key petroleum markets worldwide.
- Proven ability to match credible buyers and suppliers for secure, compliant, and efficient transactions.
- Commitment to transparency, operational excellence, and professional service.
